SUBJECT INDEX

Activation energy
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
AFBC
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Alkanol
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301
Alloy
On the peritectoid transition of the quasicrystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
Amino acid
The integral heats of solution of rare earth isothiocyanate hydrates in aqueous amino acid solutions 71
Atmosphere
Thermodynamic stability of 34 compounds of the system Y–Ba–Cu–O 309

Binary system
The enthalpy of formation of the Cd–Ga–Zn liquid system 19
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277
The use of the *F*-function of the two-parameter cubic equation of state in vapour–liquid equilibrium calculations of binary mixtures 285
Boron compound
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
Boron nitride
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77

Caesium compound
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
Calcination
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Calorimeter
Calorimetric investigations into enzyme catalysed glucose oxidation 1
Thermokinetic investigations into enzyme catalysed glucose oxidation 9
The enthalpy of formation of the Cd–Ga–Zn liquid system 19
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49
The integral heats of solution of rare earth isothiocyanate hydrates in aqueous amino acid solutions 71
Carbonate
Calorimetric and phase equilibrium data for linear carbonates + hydrocarbons or + CCl_4 mixtures. Comparison with DISQUAC predictions 57
Carbon tetrachloride
Calorimetric and phase equilibrium data for linear carbonates + hydrocarbons or + CCl_4 mixtures. Comparison with DISQUAC predictions 57
Catalysis
Calorimetric investigations into enzyme catalysed glucose oxidation 1
Catalyst
Thermokinetic investigations into enzyme catalysed glucose oxidation 9
Chalcogenide
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
Chelate
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
Chloride
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277
Chromium compound
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
Complexation
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29

Composite
Analysis of the resin transfer molding process using in-mold dielectric sensors 251
Conductivity
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
Co-ordination
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
Copper oxalate
A kinetic and mechanistic study of the thermal decomposition of copper(II) oxalate 263
Crystallization
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
CTAB
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91
Curing
Analysis of the resin transfer molding process using in-mold dielectric sensors 251
Cyclodextrin
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187

Decomposition
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187
A kinetic and mechanistic study of the thermal decomposition of copper(II) oxalate 263
Densimeter
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301
Devitrification
Non-isothermal devitrification behaviour of diopside glass 207
Dextrin
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187
Dielectric
Analysis of the resin transfer molding process using in-mold dielectric sensors 251
DISQUAC
Calorimetric and phase equilibrium data for linear carbonates + hydrocarbons or + CCl_4 mixtures. Comparison with DISQUAC predictions 57
Diopside
Non-isothermal devitrification behaviour of diopside glass 207
DSC
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
Analysis of DSC results by integration 129
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
DTA
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Non-isothermal devitrification behaviour of diopside glass 207
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
On the peritectoid transition of the quasicrystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
DTG
Simulation of dynamical thermogravimetric curves: Single and complex reactions 151
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
DTPA
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213

Enthalpy
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29

Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91
Analysis of DSC results by integration 129
Entropy
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77
Epoxy
Analysis of DSC results by integration 129
Equilibrium
The use of the *F*-function of the two-parameter cubic equation of state in vapour–liquid equilibrium calculations of binary mixtures 285
Equipment
A microthermogravimetric system for the measurement of vapour pressure by a transpiration method 175
Erythrocyte
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49
Eutectic
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277
Excess molar volume
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301

FTIRPA
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91

Gel
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91
Glass
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
Non-isothermal devitrification behaviour of diopside glass 207
Glass transition
Analysis of DSC results by integration 129
Glucose
Calorimetric investigations into enzyme catalysed glucose oxidation 1
Thermokinetic investigations into enzyme catalysed glucose oxidation 9
Glycolysis
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49
Granulocyte
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49

Haeme
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49
Halide
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29
Heat capacity
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77
Analysis of DSC results by integration 129
Heat of formation
The enthalpy of formation of the Cd–Ga–Zn liquid system 19
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77
Heat of sublimation
A microthermogravimetric system for the measurement of vapour pressure by a transpiration method 175
Hexane
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301
Hexanol
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301
Hydrocarbon
Calorimetric and phase equilibrium data for linear carbonates + hydrocarbons or + CCl_4 mixtures. Comparison with DISQUAC predictions 57

Integration
Analysis of DSC results by integration 129
Isomer
Excess molar volumes of *n*-hexane with some hexanol isomers at 298.15 K 301
Isothermal
Analysis of DSC results by integration 129
Isothiocyanate
The integral heats of solution of rare earth isothiocyanate hydrates in aqueous amino acid solutions 71

Kinetics
Thermokinetic investigations into enzyme catalysed glucose oxidation 9
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115

A kinetic and mechanistic study of the thermal decomposition of copper(II) oxalate 263

Lanthanon compound
The integral heats of solution of rare earth isothiocyanate hydrates in aqueous amino acid solutions 71
Lead chloride
Measurement of the electrical resistance of molten lead chloride at freezing 317
Limestone
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Liquidus
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277

Mediator
Calorimetric investigations into enzyme catalysed glucose oxidation 1
Melt
Measurement of the electrical resistance of molten lead chloride at freezing 317
Mercury compound
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Metabolic pathway
Calorimetric analysis of the oxidative influence of granulocytes on erythrocytes 49
Microthermogravimetry
A microthermogravimetric system for the measurement of vapour pressure by a transpiration method 175
Model
Calorimetric and phase equilibrium data for linear carbonates + hydrocarbons or + CCl_4 mixtures. Comparison with DISQUAC predictions 57
Analysis of DSC results by integration 129
Mutarotation
Calorimetric investigations into enzyme catalysed glucose oxidation 1
Thermokinetic investigations into enzyme catalysed glucose oxidation 9

Non-isothermal
A kinetic study of continuous heating crystallization in $Cu_{0.08}Ge_{0.18}Te_{0.74}$ chalcogenide glass 115
Non-isothermal devitrification behaviour of diopside glass 207

Oxidation
Thermokinetic investigations into enzyme catalysed glucose oxidation 9

Paraffin
The use of the *F*-function of the two-parameter cubic equation of state in vapour–liquid equilibrium calculations of binary mixtures 285
Phase
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277
Phase transition
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
On the peritectoid transition of the quasicrystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
Polymorph
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77
Pyrolysis
Simulation of dynamical thermogravimetric curves: Single and complex reactions 151
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199

Resin
Analysis of the resin transfer molding process using in-mold dielectric sensors 251
Resistance
Measurement of the electrical resistance of molten lead chloride at freezing 317
RTM
Analysis of the resin transfer molding process using in-mold dielectric sensors 251

SAD
On the peritectoid transition of the quasicrystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
Schiff base
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
SEM
Non-isothermal devitrification behaviour of diopside glass 207
Silica
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91

Silver compound
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Simulation
Simulation of dynamical thermogravimetric curves: Single and complex reactions 151
Thermodynamic stability of 34 compounds of the system Y–Ba–Cu–O 309
Sinterization
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Sorbent
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Stability
Thermodynamic stability of 34 compounds of the system Y–Ba–Cu–O 309
Stoichiometry
A kinetic and mechanistic study of the thermal decomposition of copper(II) oxalate 263

Superconductor
Thermodynamic stability of 34 compounds of the system Y–Ba–Cu–O 309
Surfactant
Adsorption of cetyltrimethylammonium bromide on parent and molybdenum-modified silica gels in the solid state 91

Technique
Analysis of DSC results by integration 129
Ternary system
The enthalpy of formation of the Cd–Ga–Zn liquid system 19
On the peritectoid transition of the quasi-crystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
Thermoanalysis of the system BaO_2–BaO–O_2 241
The $MgCl_2$–KCl–$CaCl_2$ phase diagram 277
TG
Simulation of dynamical thermogravimetric curves: Single and complex reactions 151
Thermal decomposition of cyclodextrins (α-, β-, γ-, and modified β-CyD) and of metal–(β-CyD) complexes in the solid phase 187
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
TGA
Factors affecting the thermogravimetric technique in the characterization of sorbents for AFBC 99
Thallium compound
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Thermochromism
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
Thermodynamics
Low-temperature heat capacity and thermodynamic properties of four boron nitride modifications 77
Thioacetamide
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29
Thiocyanatochromate
Thermal decomposition of analytically important thiocyanatochromates(III). Part 1 199
Thiourea
Thermodynamics of complex formation of Ag(I). Part 9. Investigations on Ag(I)–thiourea–thioacetamide–halide systems in aqueous solution 29
Transition
On the peritectoid transition of the quasi-crystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
Transition metal compound
Heterobinuclear chelates of some transition metal ions with chromium(III)–diethylenetriaminepentaacetato complex 213
Transpiration
A microthermogravimetric system for the measurement of vapour pressure by a transpiration method 175

Vapour pressure
A microthermogravimetric system for the measurement of vapour pressure by a transpiration method 175

XRD
Thermochromic phase transitions in manganese(II) and cobalt(II) Schiff base complexes 225
On the peritectoid transition of the quasi-crystalline and crystalline T_2 phases in rapidly solidified Al–Cu–Mn alloys 231
XRPD
Thermal, structural and possible ionic-conductor behaviour of $CsB_{10}CH_{13}$ and $CsB_{11}CH_{12}$ 123
